This article represents the table of conversion of Emoji from and to characters. When user types a set of characters, which could be converted into an emoji and sends the message, the characters convert into an emoji.

The characters are converted to emoji in one of four cases:

- Spaces are before and after the characters.

- Start of the line goes before and space goes after

- Space goes before and end of the line goes after

- End of the line goes before, and end of the line goes after

Characters	Emoji	Name		Characters	Emoji	Name
